Tercer semestre

**Ingeniería en Tecnologías de
Información y Comunicación**

Eduardo Flores Gallegos

Practica 2 Manejo de ramas con git

Objetivo: entender el flujo de trabajo de las ramas en git y practicar los conceptos

- 1- En el primer paso debemos crear
- 2- En el paso 2 debemos clonar el repositorio

A screenshot of a terminal window titled 'MINGW64/c/Users/zuley'. The terminal shows the execution of the 'git clone' command to clone a repository from GitHub. The output indicates that 3 objects were enumerated, counted, and received successfully. The prompt returns to the user's shell.

```
zuley@LAPTOP-CC0VT7DQ MINGW64 ~ (master)
$ git clone https://github.com/TECNM-Pabellon-de-Arteaga/ramas3A.git
Cloning into 'ramas3A'...
remote: Enumerating objects: 3, done.
remote: Counting objects: 100% (3/3), done.
remote: Total 3 (delta 0), reused 0 (delta 0), pack-reused 0
Receiving objects: 100% (3/3), done.

zuley@LAPTOP-CC0VT7DQ MINGW64 ~ (master)
$
```

- 3- Buscar en las ramas tu nombre con los siguientes comandos

```
MINGW64:/c/Users/zuley/ramas3A
zuley@LAPTOP-CC0VT7DQ MINGW64 ~ (master)
$ git checkout zuleyma
fatal: Unable to create 'C:/Users/zuley/.git/index.lock': File exists.

Another git process seems to be running in this repository, e.g.
an editor opened by 'git commit'. Please make sure all processes
are terminated then try again. If it still fails, a git process
may have crashed in this repository earlier:
remove the file manually to continue.

zuley@LAPTOP-CC0VT7DQ MINGW64 ~ (master)
$ cd ramas 3A
bash: cd: too many arguments

zuley@LAPTOP-CC0VT7DQ MINGW64 ~ (master)
$ cd ramas3A

zuley@LAPTOP-CC0VT7DQ MINGW64 ~/ramas3A (zuleyma)
$ git checkout zuleyma
Already on 'zuleyma'
Your branch is up to date with 'origin/zuleyma'.

zuley@LAPTOP-CC0VT7DQ MINGW64 ~/ramas3A (zuleyma)
$
```
